

AMENDMENTS TO THE SPECIFICATION

Please replace the paragraph beginning at page 1, line 11, with the following rewritten paragraph:

-- Much attention has been directed to computer internetworking problems of hacking, virus attacks, availability of unsuitable content, and other security issues. As each type of problem has developed, protective security tools have arisen to allow computers to be protected from attacks and to supervise how the computers can interact with the internetwork.--

Please replace the paragraph beginning at page 6, line 36, with the following rewritten paragraph:

-- Predefined filtering categories can be provided for selection by the user, such as alcohol, anarchy, criminal skills, cults, drugs, gambling, etc. Each user within a group can also be labeled according to age (e.g., child, pre-teen, teen, young adult) with a default ~~subsets~~ subset of filtering categories being blocked for each label.--

Please replace the paragraph beginning at page 11, line 16, with the following rewritten paragraph:

-- The Subscriptions Table ~~is~~ as shown in Figure 7 contains a subscription ID, a service ID of the service subscribed to, and a user ID of the user that is subscribing. The Subscriptions Table contains a payment type and a payment ID pointer (e.g., to a credit card entry). The Subscriptions Table also contains any time-specific ~~date~~ data such as time the subscription started, time the subscription stopped, last time a payment was made on this subscription, time the subscription will expire, and so on.--
